Truly Transformational Solutions

Infonova multi-tenant BSS Release 6 available in the Amazon Web Services cloud

INFONOVA BSS RELEASE 6 SUCCESSFULLY DEPLOYED AND TESTED IN THE AMAZON WEB SERVICES CLOUD

GRAZ, AUSTRIA - May 3rd 2009 -Infonova, one of the leading Next Generation BSS vendors, today announced the successful deployment of the Infonova BSS Release 6 on Amazon Web Services

The deployment, from first discussion to successful testing, was completed in less than a week. "The speed and ease of deployment on Amazon Web Services of Infonova's BSS Release 6 provides a useful benchmark for operators that want to pilot new business models" said Andrew Thomson, VP Infonova Solutions.

Infonova BSS Release 6 is a multi-tenant front & back office "Order-to-Cash" platform for Telco 1.0 and Telco 2.0 business models. All entities, the wholesaler aggregator, the retail operators get their own product management configuration, customer management, online & offline fulfillment, billing and collections capabilities.

It is designed to automate both the customer experience as well as the back office functionality and thereby enable a retail shopping cart capability to the retailer. Turning on a new retail operator with their own brand is only a matter of mouse clicks.

Designed and built using Java technologies, the Infonova BSS Release 6 uses virtualization and a virtual private database architecture to support multiple business models simultaneously. Each retail operator / tenant can configure, bundle and price next generation service portfolios including Broadband IP, VoIP, IPTV, as well as legacy PSTN & Mobile with other third party services, e.g. media, insurance, - for their target markets.

"The Infonova BSS with its virtual harness is ready for demonstration of core capabilities & functionality. Using an agile approach, an operator can now determine necessary configuration & other changes required and in two weekly cycles rapidly see orchestration of their legacy systems and activation of their new business models" said Andrew Thomson, VP Infonova Solutions.

About Infonova

Infonova was founded in 1989 and delivers highly automated IT solutions for Telco & Media companies. Infonova's BSS solutions have been implemented for incumbent, attacker and cable operators supporting triple & quadruple play service portfolios.

Encapsulating decades of knowledge, Infonova's latest BSS product, Release 6 is a fully J2EE order to cash platform that supports real multi-tenant order to cash operations for fully convergent and complex business models.
