

INFONOVA & I-NEW ANNOUNCE FULLY CONVERGENT SOLUTION FOR MULTI-TENANT REPEATABLE BUSINESS MODELS

INFONOVA AND I-NEW ANNOUNCE AN END2END FULLY CONVERGENT PRE-PAID, POST-PAID & REAL-TIME BSS SOLUTION FOR MULTI-TENANT / MVNO / VNE OPERATIONS

GRAZ, AUSTRIA – May 11, 2010 – Infonova, one of the leading Next Generation BSS vendors, and i-New today announced that it took only 6 weeks to integrate Infonova's BSS Release 6.3 platform and i-new's 3Green Pre-paid platform. The integration delivers an End2End fully convergent Pre-paid, Post-paid & Real-time solution "Release 6 / 3Green" delivering a very high level of convergence that can enable multi-tenant Product Managers to have End2End control over their packaging of products and services.

Infonova, who only recently announced the launch of their BSS Release 6.3 with the specific capabilities to integrate & manage Pre-paid Systems, Products & Customers seamlessly, has now demonstrated how easily the R6.3 integrates with a pre-paid platform. The integration of i-New's 3Green platform with Infonova's Release 6.3 platform is the first example of how the BSS R6 can be used to orchestrate Pre-paid platforms.

"The speed of integration and the truly convergent capabilities delivered by the integration offers both Infonova and i-New customers with an easy path to enhance their current systems" says Peter Nussbaumer, CEO of i-New, "3Green has often been installed as an OEM solution including by NSN – and all these operators can easily take advantage of this sophisticated pre-integrated solution!"

"Release 6 and 3Green are both multi-tenant, Java realizations, so the solution created delivers convergence across all dimensions. This has a significant benefit for new business models where an "Industry 2.0" tenant, such as Smartgrid's or Next Gen Healthcare's Product Manager will be able to create solutions using fully convergent Pre-paid, Post-paid & Real-time capabilities to bundle with their industry specific business rule driven services", says Andrew Thomson, SVP Infonova.

The integrated solution "Release 6 / 3Green" delivers a single Product Catalogue which enables flexible Bundling of Pre-paid /Post-Paid / Realtime products. The fully convergent Online/Offline Charging offers new business rule driven possibilities, e.g. it enables a Product Manager to define cut off points in the middle of a call when the system moves the customer from online to offline charging or vice versa – already demonstrated as a capability of the integration. With customer-centric policy control and real-time user notification enabled by the solution, these types of scenario become important options for enterprise tenant operators.

About Infonova

Infonova was founded in 1989 and delivers highly automated IT solutions for Telco, Media & Convergent as well as Utility companies. Infonova's BSS solutions have been implemented for incumbent, attacker and cable operators supporting triple & quadruple play service portfolios. Encapsulating decades of knowledge, Infonova's latest BSS product, Release 6 is a fully J2EE order to cash platform that supports real multi-tenant order to cash operations for fully convergent and complex business models.
