

## **Infonova BSS Release 6 available through HP's Developer & Solution Partner Program**

**GRAZ, AUSTRIA - November 16<sup>th</sup> 2009** –Infonova, one of the leading Next Generation BSS vendors, today announced that it has become a member of HP's Developer & Solution Partner Program (DSPP). As part of this process Infonova's latest BSS Release 6.2 has been tested on HP's range of Proliant servers.

HP's DSPP offers an easy and convenient way for independent software vendors to work with HP and other third parties to deliver solutions and services that leverage HP's broad portfolio of products and services to joint customers and prospects.

Infonova and HP have delivered solutions to customers in the past and this new relationship is a logical development that is triggered by the changing requirements of the telco industry.

"This new partnership with Infonova around their multi-tenant BSS Release 6 platform represents an innovative and flexible approach to enable communication service providers to meet the fast changing nature of their service roles across a rapidly converging marketplace" said Tony Gallacher, Business Development Manager for New Service Monetization for HP EMEA CME.

"We are thrilled to have become a member of HP's Developer & Solution Partner Program and look forward to working with HP and other third parties to deliver the innovative solutions required across the communications, media, entertainment, ICT and utilities industries" said Andrew Thomson, VP Infonova Solutions.
