ADVISORY & SOLUTION ENGINEERING

From strategy to execution,
we are your partner in successful
digital transformation

DIGITAL TRANSFORMATION FOR SUCCESS

WE ADVISE AND BUILD SOLUTIONS FOR YOUR SUCCESSFUL BUSINESS

APPROACH & CLIENT BENEFITS

Your digital transformation benefits directly from our agile and business-outcome driven approach

Infonova enables the reshaping of your business through digital transformation, utilising IT to facilitate and drive the necessary change. Our business-outcome driven approach employs agile methodologies that help ensure timely, well managed projects which deliver business value at each step along the way with a high degree of transparency, maneuverability and controllability.

Your challenges are solved by our ability

Understanding the needs of your company from a technical point of view as well as from strategy, organisation, process and economic perspectives, we provide a holistic solution for maximum business benefit, accompanying you throughout the entire journey of digital transformation and beyond.

Complete E2E solutions are provided by our comprehensive approach

With long-term experience in building E2E software enterprise solutions and managing digital transformation projects in highly complex and dynamic industries, our advisory and solutions are based on practical and proven concepts focusing on business value and low risk implementation.

DIGITAL TRANSFORMATION

DIGITAL BUSINESS STRATEGY DEVELOPMENT

Tailoring your digital business strategy for future growth.

Corporate strategies of almost all service industry businesses are being heavily influenced by the digital revolution wave. Within this completely new ecosystem, it is now necessary for companies to redefine their underlying business models. We support your organisation in defining your digital business strategy, which is heavily driven by disruptive market developments, new ecosystems and IT capabilities.

Together with our industry experts from BearingPoint and extensive networks within digital industries, we combine extensive IT know-how with business experience to optimise your digital transformation.

DIGITAL TRANSFORMATION PLANNING

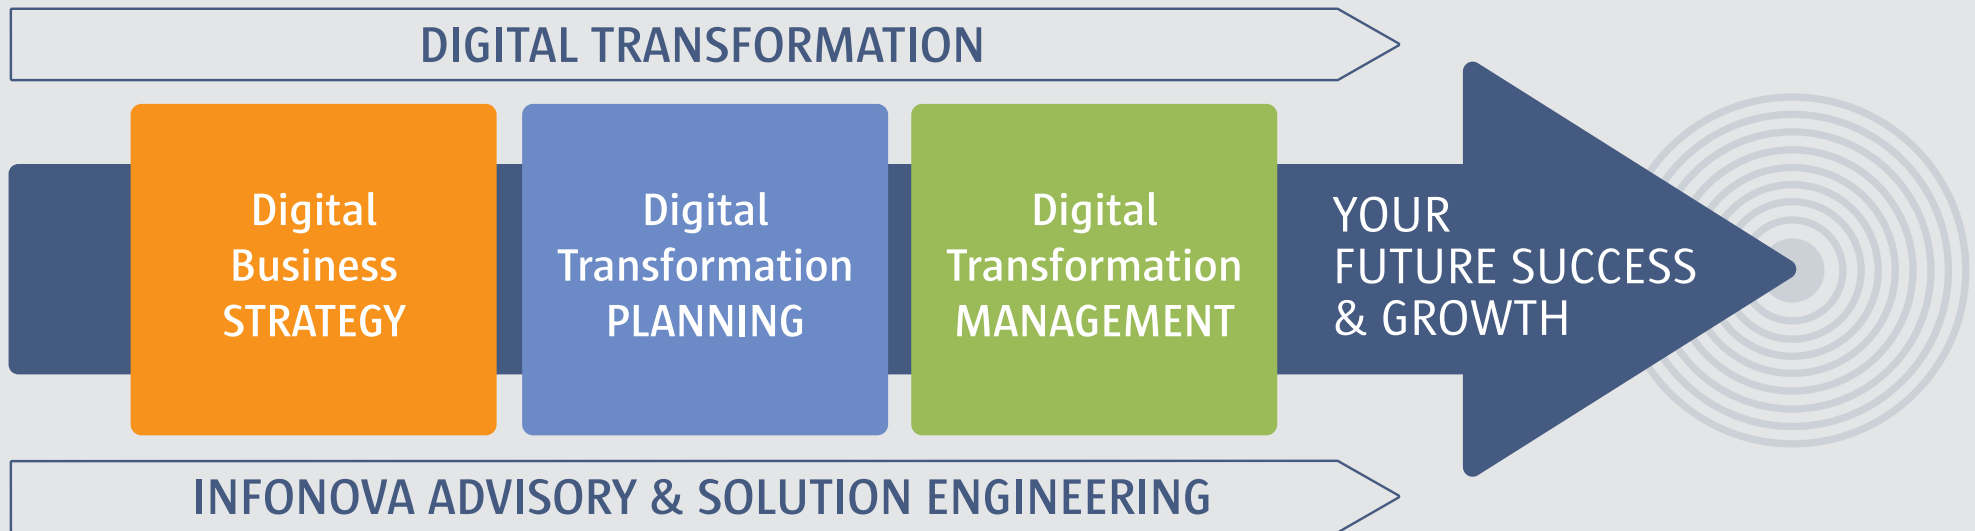

Planning your agile business outcome-driven digital transformation

Based on your individual digital strategy and the status quo of your business, we support you in defining your individual digital transformation roadmap. The anchor point is an agile business outcome-driven approach which should incorporate fast, tangible business results, highest flexibility and lowest risk.

This approach reflects the essential requirements of a digital transformation – short budgeting cycles, lean and agile organisations and processes, and maintaining focus on the technological and business goals of the innovation process.

DIGITAL TRANSFORMATION MANAGEMENT

Managing your technology-enabled successful digital transformation

The success of a digital transformation initiative is heavily influenced by the successful implementation of your underlying IT systems and infrastructure. This requires the appropriate Agile Delivery Model which includes your IT processes, organisation and governance structures.

We support your organisation in being ready to successfully deploy agile, digital innovation(s) along with the fast and cost-efficient transformation of IT infrastructure.

Our Agile Software Development & Delivery offering:

ENTERPRISE ARCHITECTURE

Creating an enterprise architecture that builds a cornerstone of your successful business

The successful development and execution of a digital strategy requires enterprise analysis, design, planning and implementation, maintaining a holistic approach throughout.

Digital enterprises need a two-speed IT architecture, encompassing both the requirements of your established business and your digital product innovation. This two-speed IT architecture allows the development of digital customer-facing capabilities at high speed, while decoupling legacy systems for which release cycles of new functionality remain at a slower pace.

We help you to define and implement a two-speed enterprise IT architecture as a fundamental cornerstone of your enterprise.

STRATEGY MAPPING ONTO DOMAINS & CAPABILITIES

SYSTEM PORTFOLIO TRANSFORMATION PLANNING

SOLUTIONS & TECHNOLOGIES VISION & GOVERNANCE

BUSINESS & TECHNOLOGY GUIDANCE

SOLUTION DESIGN

Designing a customised solution to achieve your digital transformation goals

Translating digital strategy into business requirements and technology solutions, and implementing those solutions at scale, is the Achilles' heel of digitisation.

We support you in making the right technical choices: the right target data architecture, the right applications and tools and the right infrastructure environment.
